# ULTRASOUND IN MEDICINE AND BIOLOGY

## WORLD FEDERATION FOR ULTRASOUND IN MEDICINE AND BIOLOGY

*President:* HORACE THOMPSON, *Shreveport, U.S.A.*
*Vice-President:* M. FUKUDA, *Sapporo, Japan*
*Past-President:* GEORGE KOSSOFF, *Chatswood, Australia*
*President-Elect:* F. WEILL, *Besançon, France*
*Treasurer:* BARRY GOLDBERG, *Philadelphia, U.S.A.*
*Secretary:* DAVID ROBINSON, *Chatswood, Australia*
*Editor of the Journal:* DENIS WHITE, *Kingston, Canada*
*Councillors:* A. KRATOCHWIL, *Baden, Austria*
R. A. MEYER, *Cincinnati, U.S.A.*
H. E. TRIER, *Bonn, G.F.R.*
H. WATANABE, *Kyoto, Japan*
M. ZISKIN, *Philadelphia, U.S.A.*

---

## AFFILIATED SOCIETIES

**American Institute of Ultrasound in Medicine (AIUM),** F. Kremkau, Secretary, 4405 East-West Highway, Suite 504, Bethesda, MD 20814, U.S.A.

**Asian Federation of Societies for Ultrasound in Medicine and Biology (AFSUMB),** M. Fukuda, Secretary, Fourth Department of Internal Medicine, Sapporo Medical College, S-1, W-17, Sapporo, Japan

**Australian Society for Ultrasound in Medicine (ASUM),** P. Duffy, Secretary, 126 Greville Street, Chatswood, NSW 2067, Australia

**Egyptian Society for Ultrasonics (ESU),** Dr. Y. Mohran, Secretary, 376 Pyramids Road, Giza, Cairo, Egypt

**European Federation of Societies for Ultrasound in Medicine and Biology (EFSUMB),** T. Nordhust, Department of Radiology, Rontgen-Barneklinik, Rikshospitalet, Oslo 1, Norway

**Latin-American Federation of Societies of Ultrasound in Medicine and Biology (LAFSUMB),** Dr. J. Schmillevitch, Secretary, Rua Itapeva, 518-cj. 810-9° andar, 01332, São Paulo, Brazil

**Societas Internationalis pro Diagnostica Ultrasonica in Ophthalmologia (SIDUO),** J. M. Thijssen, Universiteitskliniek voor Oogheelkunde, Philips van Leydenlaan 15, Nijmegen, The Netherlands

**South African Medical Ultrasound Society (SAMUS),** E. Goudie, Secretary, 27 St. Patrick Road, Houghton, Johannesburg, 2196 South Africa

*Publishing, Advertising, and Subscription Offices*: Pergamon Journals Inc., Fairview Park, Elmsford, NY 10523, U.S.A.; or Pergamon Journals Ltd., Headington Hill Hall, Oxford OX3 0BW, England.

*Published 9 per annum. Annual institutional subscription rate* (1988): US $255.00; *Two-year institutional subscription rate* (1988/89): US $484.50. *Personal subscription rate* for those whose library subscribes at the regular rate (1988): US $90.00. Members of the World Federation for Ultrasound in Medicine and Biology may order personal subscriptions at a concessional rate; details of these rates are available upon request. Prices are subject to change without notice. Notify 8 weeks in advance of address change with a copy of the subscription mailing label. *Microform subscriptions:* Information available upon request.

*Ultrasound in Medicine and Biology* (ISSN 0301-5629) Nine issues per annum. Second-Class postage paid at Elmsford, NY and additional mailing offices. POSTMASTER: Send address changes to: *Ultrasound in Medicine and Biology*, Pergamon Journals, Inc., Fairview Park, Elmsford, NY 10523.

# AUTHOR/SUBJECT INDEX

A

*A-scan*
influence of pathological state on the acoustic attenuation coefficient slope of liver (Afschrift), 135

*Ablation*
analytical modelling of ultrasonically induced tissue heating (Lizzi), 607

*Absorption*
demonstration of enhanced temperature elevation due to nonlinear propagation of focussed ultrasound in dog's thigh *in vivo* (Hynynen), 85

*Acoustic cavitation*
a review of the ultrasonic bioeffects of microsonation, gas-body activation and related cavitation-like phenomena (Miller), 443
acoustic cavitation and the safety of diagnostic ultrasound (Carstensen), 597
acoustic cavitation generated by an extracorporeal shockwave lithotripter (Coleman), 69
ultrasonically induced gas bubble production in agar based gels: part I, experimental investigation (Daniels), 527
ultrasonically induced gas bubble production in agar based gels: part II, theoretical analysis (Crum), 541

*Acoustic image*
the use of acoustic microscopy for biological tissue characterization (Kolosov), 477

*Acoustic microscopy*
the use of acoustic microscopy for biological tissue characterization (Kolosov), 477

*Acoustic parameters*
the use of acoustic microscopy for biological tissue characterization (Kolosov), 477

*Acoustic streaming*
ultrasound-induced light transmission change within platelet suspensions as an indirect measure of platelet morphology: preliminary correlation with stirring-induced light transmission change (Trenchard), 197
ultrasound-induced orientation of discoid platelets and simultaneous changes in light transmission: preliminary characterisation of the phenomenon (Trenchard), 183
Afschrift, M., Cuvelier, C., Ringoir, S. and Barbier, F.: influence of pathological state on the acoustic attenuation coefficient slope of liver, 135

*Age-related changes*
a vector based approach to age-related changes of Doppler velocity waveforms in the brachial artery (Golczewski), 15

*Anatomy*
labelling of ultrasono-tomograms of the heart (Ide)
L354 the value of ultrasound in the initial assessment of gynecological patients (Kurjak), 401

*Anisotropic velocity*
the variation of sonic plesio-velocity in dose dependent lathyritic rabbit femurs (Lees), 19

*Annular array*
two-dimensional echocardiographic imaging: *in vitro* comparison of conventional and dynamically focused annular array transducers (Pini), 643

*Antidiuretic hormone*
failure to demonstrate a vasoconstrictive effect of vasopressin on the internal carotid and middle cerebral arteries: a transcranial ultrasound Doppler study (Krapf), 131

*Aorta*
Doppler assessment of aortic stenosis: Bernoulli revisited (Rijsterborgh), 241
Doppler ultrasound in aortic stenosis: *in vitro* studies of pressure gradient determination (Holen), 321
Arbeille, Ph., Roncin, A., Berson, M., Patat, F. and Pourcelot, L.: exploration of the fetal cerebral blood flow by duplex Doppler-linear array system in normal and pathological pregnancies, 329
Arbeille, Ph., see Berson, M.

*Array*
a linear array system for deep vessel explorations (Berson), 267
two-dimensional echocardiographic imaging: *in vitro* comparison of conventional and dynamically focused annular array transducers (Pini), 643

*Artery*
a vector based approach to age-related changes of Doppler velocity waveforms in the brachial artery (Golczewski), 15
Doppler assessment of aortic stenosis: Bernoulli revisited (Rijsterborgh), 241
Doppler examination of the periorbital arteries adds valuable hemodynamic information in carotid artery disease (Sillesen), 177
Doppler ultrasound in aortic stenosis: *in vitro* studies of pressure gradient determination (Holen), 321
exploration of the fetal cerebral blood flow by duplex Doppler-linear array system in normal and pathological pregnancies (Arbeille), 329
failure to demonstrate a vasoconstrictive effect of vasopressin on the internal carotid and middle cerebral arteries: a transcranial ultrasound Doppler study (Krapf), 131
*in vitro* study of continuous wave Doppler spectral changes resulting from stenoses and bulbs (Morin), 5
insufficiency of carotid and vertebral flow velocity in cerebrovascular disease: a continuous wave Doppler study (Colon), 339
spectrum analysis in carotid sonography (Zwiebel), 625
the clinical use of objective quantification of flow disturbance in carotid artery disease: correlation between spectral broadening index and arteriography (Sillesen), 519
variability in measurement of specific parameters for carotid duplex examination (Kohler), 637

*Arterial stenosis*
*in vitro* study of continuous wave Doppler spectral changes resulting from stenoses and bulbs (Morin), 5

insufficiency of carotid and vertebral flow velocity in cerebrovascular disease: a continuous wave Doppler study (Colon), 339
spectrum analysis in carotid sonography (Zwiebel), 625
the clinical use of objective quantification of flow disturbance in carotid artery disease: correlation between spectral broadening index and arteriography (Sillesen), 519
variability in measurement of specific parameters for carotid duplex examination (Kohler), 637
Assmann, P. E. and Roelandt, J. R. T. C.: two-dimensional and Doppler echocardiography in acute myocardial infarction and its complications, 507

*Attenuation*
influence of pathological state on the acoustic attenuation coefficient slope of liver (Afschrift), 135
the use of acoustic microscopy for biological tissue characterization (Kolosov), 477

*Autocorrelation*
orientation and frequency dependence of backscatter coefficient in normal and pathological breast tissues (Landini), 77

**B**

*B-mode imaging*
a linear array system for deep vessel explorations (Berson), 267
a particulate contrast agent with potential for ultrasound imaging of liver (Parker), 555
the value of ultrasound in the initial assessment of gynecological patients (Kurjak), 401
two-dimensional and Doppler echocardiography in acute myocardial infarction and its complications (Assman), 507
two-dimensional echocardiographic imaging: *in vitro* comparison of conventional and dynamically focused annular array transducers (Pini), 643

*Backscatter*
orientation and frequency dependence of backscatter coefficient in normal and pathological breast tissues (Landini), 77
Bacon, D. R., see Coleman, A. J.
Bailey, K. I., O'Brien, W. D., Jr. and Dunn, F.: ultrasonically induced temperature elevation in the mouse ovary, L26
Bamber, J. C., see Sambrook, M.
Barbier, F., see Afschrift, M.
di Bari, M., see Pini, R.
Barnard, S. M., see Lees, S.
Barrick, M. K., see Pay, T. L.
Beach, K. W., see Kohler, T. R.
Beach, K. W., see Zierler, R. E.

*Beam profile*
a linear array system for deep vessel explorations (Berson), 267
biological effects of shock waves: lung hemorrhage by shock waves in dogs —pressure dependence (Delius), 61
demonstration of enhanced temperature elevation due to nonlinear propagation of focussed ultrasound in dog's thigh *in vivo* (Hynynen), 85

two-dimensional echocardiographic imaging: *in vitro* comparison of conventional and dynamically focused annular array transducers (Pini), 643
ultrasound-induced light transmission change within platelet suspensions as an indirect measure of platelet morphology: preliminary correlation with stirring-induced light transmission change (Trenchard), 197
ultrasound-induced orientation of discoid platelets and simultaneous changes in light transmission: preliminary characterisation of the phenomenon (Trenchard), 183

*Bernoulli*
Doppler assessment of aortic stenosis: Bernoulli revisited (Rijsterborgh), 241
Berson, M., Ronchin, A., Arbeille, Ph., Patat, F. and Pourcelot, L.: a linear array system for deep vessel explorations, 267
Berson, M., see Arbeille, Ph.

*Bioeffects*
a review of the ultrasonic bioeffects of microsonation, gas-body activation and related cavitation-like phenomena (Miller), 443
acoustic cavitation and the safety of diagnostic ultrasound (Carstensen), 597
analytical modelling of ultrasonically induced tissue heating (Lizzi), 607
biological effects of shock waves: lung hemorrhage by shock waves in dogs —pressure dependence (Delius), 61
effect of therapeutic level ultrasound in visual evoked potentials in the hypoxic cat (Forester), 259
effects of MHz ultrasound on electrical pain threshold perception in humans (Williams), 249
the effect of pulsed ultrasound on the survival of Drosophila (Pay), 93
the use of ultrasound by physiotherapists in Britain, 1985 (ter Haar), 659
ultrasonically induced temperature elevation in the mouse ovary (Bailey), L26
Birsch, K., see Sillesen, H.
Blondel, D., see Daniels, S.

*Blood*
a review of the ultrasonic bioeffects of microsonation, gas-body activation and related cavitation-like phenomena (Miller), 443
ultrasound-induced light transmission change within platelet suspensions as an indirect measure of platelet morphology: preliminary correlation with stirring-induced light transmission change (Trenchard), 197
ultrasound-induced orientation of discolid platelets and simultaneous changes in light transmission: preliminary characterisation of the phenomenon (Trenchard), 183

*Blood flow*
a linear array system for deep vessel explorations (Berson), 267
Doppler assessment of aortic stenosis: Bernoulli revisited (Rijsterborgh), 241
exploration of the fetal cerebral blood flow by duplex Doppler-linear array system in normal and pathological pregnancies (Arbeille), 329
failure to demonstrate a vasoconstrictive effect of vasopressin on the internal carotid and middle cerebral arteries: a transcranial ultrasound Doppler study (Krapf), 131
*in vitro* study of continuous wave Doppler spectral changes resulting from stenoses and bulbs (Morin), 5
insufficiency of carotid and vertebral flow velocity in cerebrovascular disease: a continuous wave Doppler study (Colon), 339

noninvasive assessment of normal carotid bifurcation hemodynamics with color-flow ultrasound imaging (Zierler), 471
spectrum analysis in carotid sonography (Zwiebel), 625
the value of ultrasound in the initial assessment of gynecological patients (Kurjak), 401
two-dimensional and Doppler echocardiography in acute myocardial infarction and its complications (Assman), 507
ultrasonic Doppler study of the hormone response of blood flow in the normal human breast (Sambrook), 121

*Bone*
the variation of sonic plesio-velocity in dose dependent lathyritic rabbit femurs (Lees), 19

*Borda's equation*
Doppler ultrasound in aortic stenosis: *in vitro* studies of pressure gradient determination (Holen), 321
Bowditch, M., see Williams A. R.

*Breast*
orientation and frequency dependence of backscatter coefficient in normal and pathological breast tissues (Landini), 77
ultrasonic Doppler study of the hormone response of blood flow in the normal human breast (Sambrook), 121
Brendel, W., see Delius, M.
Breyer, B., see Kurjak, A.

*Bubbles*
a review of the ultrasonic bioeffects of microsonation, gas-body activation and related cavitation-like phenomena (Miller), 443
acoustic cavitation and the safety of diagnostic ultrasound (Carstensen), 597
ultrasonically induced gas bubble production in agar based gels: part I, experimental investigation (Daniels), 527
ultrasonically induced gas bubble production in agar based gels: part II, theoretical analysis (Crum), 541

*Broadband pulsed ultrasound*
orientation and frequency dependence of backscatter coefficient in normal and pathological breast tissues (Landini), 77

## C

*Calibration*
a linear array system for deep vessel explorations (Berson), 267
factors affecting the choice of preamplification for ultrasonic hydrophone probes (Lewin), 141
ultrasound-induced light transmission change within platelet suspensions as an indirect measure of platelet morphology: preliminary correlation with stirring-induced light transmission change (Trenchard), 197
ultrasound-induced orientation of discoid platelets and simultaneous changes in light transmission: preliminary characterisation of the phenomenon (Trenchard), 183
van Campen, J., see Colon, E.

*Cardiac imaging*
labelling of ultrasono-tomograms of the heart (Ide), L354
two-dimensional and Doppler echocardiography in acute myocardial infarction and its complications (Assman), 507
two-dimensional echocardiographic imaging: *in vitro* comparison of conventional and dynamically focused annular array transducers (Pini), 643

*Cardiology*
Doppler assessment of aortic stenosis: Bernoulli revisited (Rijsterborgh), 241
Doppler ultrasound in aortic stenosis: *in vitro* studies of pressure gradient determination (Holen), 321
labelling of ultrasono-tomograms of the heart (Ide), L354
two-dimensional and Doppler echocardiography in acute myocardial infarction and its complications (Assman), 507
two-dimensional echocardiographic imaging: *in vitro* comparison of conventional and dynamically focused annular array transducers (Pini), 643

*Carotid artery*
Doppler examination of the periorbital arteries adds valuable hemodynamic information in carotid artery disease (Sillesen), 177
failure to demonstrate a vasoconstrictive effect of vasopressin on the internal carotid and middle cerebral arteries: a transcranial ultrasound Doppler study (Krapf), 131
*in vitro* study of continuous wave Doppler spectral changes resulting from stenoses and bulbs (Morin), 5
insufficiency of carotid and vertebral flow velocity in cerebrovascular disease: a continuous wave Doppler study (Colon), 339
noninvasive assessment of normal carotid bifurcation hemodynamics with color-flow ultrasound imaging (Zierler), 471
spectrum analysis in carotid sonography (Zwiebel), 625
the clinical use of objective quantification of flow disturbance in carotid artery disease: correlation between spectral broadening index and arteriography (Sillesen), 519
variability in measurement of specific parameters for carotid duplex examination (Kohler), 637
Carstensen, E. L.: acoustic cavitation and the safety of diagnostic ultrasound, 597

*Cat*
effect of therapeutic level ultrasound in visual evoked potentials in the hypoxic cat (Forester), 259

*Cavitation*
a review of the ultrasonic bioeffects of microsonation, gas-body activation and related cavitation-like phenomena (Miller), 443
acoustic cavitation and the safety of diagnostic ultrasound (Carstensen), 597
acoustic cavitation generated by an extracorporeal shockwave lithotripter (Coleman), 69
ultrasonically induced gas bubble production in agar based gels: part I, experimental investigation (Daniels), 527
ultrasonically induced gas bubble production in agar based gels: part II, theoretical analysis (Crum), 541

*Cell aggregation*
a review of the ultrasonic bioeffects of microsonation, gas-body activation and related cavitation-like phenomena (Miller), 443
acoustic cavitation and the safety of diagnostic ultrasound (Carstensen), 597

*Cell death*
a review of the ultrasonic bioeffects of microsonation, gas-body activation and related cavitation-like phenomena (Miller), 443
acoustic cavitation and the safety of diagnostic ultrasound (Carstensen), 597

*Cell lysis*
a review of the ultrasonic bioeffects of microsonation, gas-body activation and related cavitation-like phenomena (Miller), 443
acoustic cavitation and the safety of diagnostic ultrasound (Carstensen), 597

*Cerebral arteries*
exploration of the fetal cerebral blood flow by duplex Doppler-linear array system in normal and pathological pregnancies (Arbeille), 329
failure to demonstrate a vasoconstrictive effect of vasopressin on the internal carotid and middle cerebral arteries: a transcranial ultrasound Doppler study (Krapf), 131
insufficiency of carotid and vertebral flow velocity in cerebrovascular disease: a continuous wave Doppler study (Colon), 339

*Cerebral autoregulation*
insufficiency of carotid and vertebral flow velocity in cerebrovascular disease: a continuous wave Doppler study (Colon), 339

*Cerebral hemodynamics*
insufficiency of carotid and vertebral flow velocity in cerebrovascular disease: a continuous wave Doppler study (Colon), 339

*Cerebral-index*
exploration of the fetal cerebral blood flow by duplex Doppler-linear array system in normal and pathological pregnancies (Arbeille), 329

*Cerebro-placental ratio (CPR)*
exploration of the fetal cerebral blood flow by duplex Doppler-linear array system in normal and pathological pregnancies (Arbeille), 329
Cerofolini, M., see Pini, R.

*Characterization*
a vector based approach to age-related changes of Doppler velocity waveforms in the brachial artery (Golczewski), 15
factors affecting the choice of preamplification for ultrasonic hydrophone probes (Lewin), 141
influence of pathological state on the acoustic attenuation coefficient slope of liver (Afschrift), 135
orientation and frequency dependence of backscatter coefficient in normal and pathological breast tissues (Landini), 77
the use of acoustic microscopy for biological tissue characterization (Kolosov), 477

Chivers, R. C., see Lewin, P. A.
Chivers, R. C., see Reantragoon, S.
Churchill, D., see Lees, S.
Coleman, A. J. and Saunders, J. E.: focusing of shock waves in the Dornier lithotripter, L25
Coleman, A. J., Saunders, J. E., Crum, L. A. and Dyson, M.: acoustic cavitation generated by an extracorporeal shockwave lithotripter, 69
Coleman, A. J., Saunders, J. E., Preston, R. C. and Bacon, D. R.: pressure waveforms generated by a Dornier extracorporeal shock-wave lithotripter, 651

*Collagen cross-linking*
the variation of sonic plesio-velocity in dose dependent lathyritic rabbit femurs (Lees), 19
Colon, E., Schulte, B. and van Campen, J.: insufficiency of carotid and vertebral flow velocity in cerebrovascular disease: a continuous wave Doppler and study, 339

*Color coded Doppler*
color coded Doppler scans (Takeuchi), L151
color coded Doppler scans (Kremkau), L152
color coded Doppler systems (Takeuchi), L210
color coded Doppler systems (White), L209
noninvasive assessment of normal carotid bifurcation hemodynamics with color-flow ultrasound imaging (Zierler), 471
two-dimensional and Doppler echocardiography in acute myocardial infarction and its complications (Assman), 507

*Computer processing*
an approach to digital signal processing for ultrasonics research (Knight), 345
influence of pathological state on the acoustic attenuation coefficient slope of liver (Afschrift), 135
orientation and frequency dependence of backscatter coefficient in normal and pathological breast tissues (Landini), 77

*Computer simulation*
acoustic cavitation generated by an extracorporeal shockwave lithotripter (Coleman), 69
analytical modelling of ultrasonically induced tissue heating (Lizzi), 607

*Contrast*
a particulate contrast agent with potential for ultrasound imaging of liver (Parker), 555
the use of acoustic microscopy for biological tissue characterization (Kolosov), 477

*Correlation*
orientation and frequency dependence of backscatter coefficient in normal and pathological breast tissues (Landini), 77

*Cost-benefit*
the prudent use of diagnostic ultrasound (Wells), 391
Crum, L. A., Daniels, S., ter Haar, G. R. and Dyson, M.: ultrasonically induced gas bubble production in agar based gels: part II, theoretical analysis, 541

Crum, L. A., see Coleman, A. J.
Crum, L. A., see Daniels, S.
Cuvelier, C., see Afschrift, M.

Daniels, S., Blondel, D., Crum, L. A., ter Haar, G. R. and Dyson, M.: ultrasonically induced gas bubble production in agar based gels: part I, experiental investigation, 527
Delius, M., Enders, G., Heine, G., Stark, J., Remberger, K. and Brendel, W.: biological effects of shock waves: lung hemorrhage by shock waves in dogs—pressure dependence, 61

*Developing countries*
ultrasound in developing countries (Kurjak), L277
Devereux, R. B., see Pini, R.

*Diffraction*
orientation and frequency dependence of backscatter coefficient in normal and pathological breast tissues (Landini), 77

*Digital image processing*
an approach to digital signal processing for ultrasonics research (Knight), 345
the use of acoustic microscopy for biological tissue characterization (Kolosov), 477

*Discoid platelets*
ultrasound-induced light transmission change within platelet suspensions as an indirect measure of platelet morphology: preliminary correlation with stirring-induced light transmission change (Trenchard), 197
ultrasound-induced orientation of discoid platelets and simultaneous changes in light transmission: preliminary characterisation of the phenomenon (Trenchard), 183

*Dissolved gases*
a review of the ultrasonic bioeffects of microsonation, gas-body activation and related cavitation-like phenomena (Miller), 443

*Dog*
biological effects of shock waves: lung hemorrhage by shock waves in dogs —pressure dependence (Delius), 61
demonstration of enhanced temperature elevation due to nonlinear propagation of focussed ultrasound in dog's thigh *in vivo* (Hynynen), 85

*Doppler*
a linear array system for deep vessel explorations (Berson), 267
a vector based approach to age-related changes of Doppler velocity waveforms in the brachial artery (Golczewski), 15
color coded Doppler scans (Takeuchi), L151
color coded Doppler scans (Kremkau), L152
color coded Doppler systems (Takeuchi), L210
color coded Doppler systems (White), L209
Doppler assessment of aortic stenosis: Bernoulli revisited (Rijsterborgh), 241

Doppler examination of the periorbital arteries adds valuable hemodynamic information in carotid artery disease (Sillesen), 177
Doppler ultrasound in aortic stenosis: *in vitro* studies of pressure gradient determination (Holen), 321
exploration of the fetal cerebral blood flow by duplex Doppler-linear array system in normal and pathological pregnancies (Arbeille), 329
failure to demonstrate a vasoconstrictive effect of vasopressin on the internal carotid and middle cerebral arteries: a transcranial ultrasound Doppler study (Krapf), 131
*in vitro* study of continuous wave Doppler spectral changes resulting from stenoses and bulbs (Morin), 5
insufficiency of carotid and vertebral flow velocity in cerebrovascular disease: a continuous wave Doppler study (Colon), 339
noninvasive assessment of normal carotid bifurcation hemodynamics with color-flow ultrasound imaging (Zierler), 471
spectrum analysis in carotid sonography (Zwiebel), 625
ultrasonic Doppler study of the hormone response of blood flow in the normal human breast (Sambrook), 121
variability in measurement of specific parameters for carotid duplex examination (Kohler), 637

*Dosimetry*
acoustic cavitation and the safety of diagnostic ultrasound (Carstensen), 597
analytical modelling of ultrasonically induced tissue heating (Lizzi), 607
demonstration of enhanced temperature elevation due to nonlinear propagation of focussed ultrasound in dog's thigh *in vivo* (Hynynen), 85
the effect of pusled ultrasound on the survival of Drosophila (Pay), 93
the prudent use of diagnostic ultrasound (Wells), 391
the use of ultrasound by physiotherapists in Britain, 1985 (ter Haar), 659

*Drosophila*
a review of the ultrasonic bioeffects of microsonation, gas-body activation and related cavitation-like phenomena (Miller), 443
acoustic cavitation and the safety of diagnostic ultrasound (Carstensen), 597
the effect of pulsed ultrasound on the survival of Drosophila (Pay), 93
Dunn, F., see Bailey, K. I.

*Duplex scanning*
a linear array system for deep vessel explorations (Berson), 267
exploration of the fetal cerebral blood flow by duplex Doppler-linear array system in normal and pathological pregnancies (Arbeille), 329
noninvasive assessment of normal carotid bifurcation hemodynamics with color-flow ultrasound imaging (Zierler), 471
variability in measurement of specific parameters for carotid duplex examination (Kohler), 637

*Dynamic focusing*
two-dimensional echocardiographic imaging: *in vitro* comparison of conventional and dynamically focused annular array transducers (Pini), 643
Dyson, M., see Coleman, A. J.
Dyson, M., see ter Haar, G.

**E**

*Echo-cardiography*
Doppler assessment of aortic stenosis: Bernoulli revisited (Rijsterborgh), 241
labelling of ultrasono-tomograms of the heart (Ide), L354
two-dimensional and Doppler echocardiography in acute myocardial infarction and its complications (Assman), 507
two-dimensional echocardiographic imaging: *in vitro* comparison of conventional and dynamically focused annular array transducers (Pini), 643

*Ectopic pregnancy*
the value of ultrasound in the initial assessment of gynecological patients (Kurjak), 401

*Education*
ultrasound in developing countries (Kurjak), L277

*Elastic modulus*
the variation of sonic plesio-velocity in dose dependent lathyritic rabbit femurs (Lees), 19

*Electrical pain*
effects of MHz ultrasound on electrical pain threshold perception in humans (Williams), 249

*Elodea*
a review of the ultrasonic bioeffects of microsonation, gas-body activation and related cavitation-like phenomena (Miller), 443
acoustic cavitation and the safety of diagnostic ultrasound (Carstensen), 597
Enders, G., see Delius, M.

*Errors*
factors affecting the choice of preamplification for ultrasonic hydrophone probes (Lewin), 141
therapeutic ultrasound and the liver *in vivo* (Pearson), L353
ultrasonically induced temperature elevation in the mouse ovary (Bailey), L26
variability in measurement of specific parameters for carotid duplex examination (Kohler), 637

*Exposure*
the prudent use of diagnostic ultrasound (Wells), 391
the use of ultrasound by physiotherapists in Britain, 1985 (ter Haar), 659

*Eye*
analytical modelling of ultrasonically induced tissue heating (Lizzi), 607

**F**

Ferrocci, L., see Pini, R.

*Fetal growth retardation*
exploration of the fetal cerebral blood flow by duplex Doppler-linear array system in normal and pathological pregnancies (Arbeille), 329

*Fetal measurements*
a linear array system for deep vessel explorations (Berson), 267

*Flow separation*
noninvasive assessment of normal carotid bifurcation hemodynamics with color-flow ultrasound imaging (Zierler), 471

*Flow visualization*
noninvasive assessment of normal carotid bifurcation hemodynamics with color-flow ultrasound imaging (Zierler), 471

*Focused ultrasound*
analytical modelling of ultrasonically induced tissue heating (Lizzi), 607
biological effects of shock waves: lung hemorrhage by shock waves in dogs —pressure dependence (Delius), 61
demonstration of enhanced temperature elevation due to nonlinear propagation of focussed ultrasound in dog's thigh *in vivo* (Hynynen), 85
two-dimensional echocardiographic imaging: *in vitro* comparison of conventional and dynamically focused annular array transducers (Pini), 643
Forester, G. V., Peterson, E. A. and Roy, O. Z.: effect of therapeutic level ultrasound in visual evoked potentials in the hypoxic cat, 259

*Frequency*
the use of ultrasound by physiotherapists in Britain, 1985 (ter Haar), 659

*Frequency dependence*
orientation and frequency dependence of backscatter coefficient in normal and pathological breast tissues (Landini), 77
ultrasonically induced gas bubble production in agar based gels: part I, experimental investigation (Daniels), 527
ultrasonically induced gas bubble production in agar based gels: part II, theoretical analysis (Crum), 541

## G

*Gas-body activation*
a review of the ultrasonic bioeffects of microsonation, gas-body activation and related cavitation-like phenomena (Miller), 443
acoustic cavitation and the safety of diagnostic ultrasound (Carstensen), 597
ultrasonically induced gas bubble production in agar based gels: part I, experimental investigation (Daniels), 527
ultrasonically induced gas bubble production in agar based gels: part II, theoretical analysis (Crum), 541
Golberg, B. B. and Kondratas, R.: preserving the history of diagnostic ultrasound, 239
Golczewski, T. and Krajewski, A.: a vector based approach to age-related changes of Doppler velocity waveforms in the brachial artery, 15
Gramiak, R., see Holen, J.
Greppi, B., see Pini, R.

*Gynecologic ultrasonography*
symptomatic hyponatremia after gynecologic ultrasonography (Hersch), L278
the value of ultrasound in the initial assessment of gynecological patients (Kurjak), 401

H

ter Haar, G.: standards for reporting ultrasonic exposures, L668
ter Haar, G., Dyson, M. and Oakley, E. M.: the use of ultrasound by physiotherapists in Britain, 1985, 659
ter Haar, G. R., see Crum, L. A.
ter Haar, G. R., see Daniels, S.

*Haemolysis*
therapeutic ultrasound and the liver *in vivo* (Pearson), L353
Hansen, H. J. B., see Sillesen, H.
Hansen, L., see Sillesen, H.

*Health increment*
the prudent use of diagnostic ultrasound (Wells), 391

*Health decrement*
the prudent use of diagnostic ultrasound (Wells), 391

*Heating*
a review of the ultrasonic bioeffects of microsonation, gas-body activation and related cavitation-like phenomena (Miller), 443
analytical modelling of ultrasonically induced tissue heating (Lizzi), 607
demonstration of enhanced temperature elevation due to nonlinear propagation of focussed ultrasound in dog's thigh *in vivo* (Hynynen), 85
effect of therapeutic level ultrasound in visual evoked potentials in the hypoxic cat (Forester), 259
effects of MHz ultrasound on electrical pain threshold perception in humans (Williams), 249
Heine, G., see Delius, M.

*Hemorrhage*
biological effects of shock waves: lung hemorrhage by shock waves in dogs —pressure dependence (Delius), 61

Hersch, M.: symptomatic hyponatremia after gynecologic ultrasonography, L278
Hill, C. R., see Sambrook, M.

*Histology*
biological effects of shock waves: lung hemorrhage by shock waves in dogs —pressure dependence (Delius), 61
orientation and frequency dependence of backscatter coefficient in normal and pathological breast tissues (Landini), 77
the use of acoustic microscopy for biological tissue characterization (Kolosov), 477

*History*
preserving the history of diagnostic ultrasound (Goldberg), 239
Holen, J., Waag, R. C. and Gramiak, R.: Doppler ultrasound in aortic stenosis: *in vitro* studies of pressure gradient determination, 321

*Hormonal effects*
ultrasonic Doppler study of the hormone response of blood flow in the normal human breast (Sambrook), 121

*Hydrophone*
acoustic cavitation generated by an extracorporeal shockwave lithotripter (Coleman), 69
effects of MHz ultrasound on electrical pain threshold perception on humans (Williams), 249
factors affecting the choice of preamplification for ultrasonic hydrophone probes (Lewin), 141
ultrasonically induced gas bubble production in agar based gels: part I, experimental investigation (Daniels), 527
Hynynen, K.: demonstration of enhanced temperature elevation due to nonlinear propagation of focussed ultrasound in dog's thigh *in vivo,* 85

*Hypertension*
exploration of the fetal cerebral blood flow by duplex Doppler-linear array system in normal and pathological pregnancies (Arbeille), 329

*Hyperthermia*
analytical modelling of ultrasonically induced tissue heating (Lizzi), 607
demonstration of enhanced temperature elevation due to nonlinear propagation of focussed ultrasound in dog's thigh *in vivo* (Hynynen), 85

*Hyponatremia*
symptomatic hyponatremia after gynecologic ultrasonography (Hersch), L278

*Hypoxia*
effect of therapeutic level ultrasound in visual evoked potentials in the hypoxic cat (Forester), 259

I

Ide, M.: labelling of ultrasono-tomograms of the heart, L354

*Image processing*
an approach to digital signal processing for ultrasonics research (Knight), 345
the use of acoustic microscopy for biological tissue characterization (Kolosov), 477

*Imaging*
a linear array system for deep vessel explorations (Berson), 267
a particulate contrast agent with potential for ultrasound imaging of liver (Parker), 555
labelling of ultrasono-tomograms of the heart (Ide), L354
noninvasive assessment of normal carotid bifurcation hemodynamics with color-flow ultrasound imaging (Zierler), 471
the prudent use of diagnostic ultrasound (Wells), 391
the use of acoustic microscopy for biological tissue characterization (Kolosov), 477
the value of ultrasound in the initial assessment of gynecological patients (Kurjak), 401
two-dimensional and Doppler echocardiography in acute myocardial infarction and its complications (Assman), 507
variability in measurement of specific parameters for carotid duplex examination (Kohler), 637

*Intensity*
demonstration of enhanced temperature elevation due to nonlinear propagation of focussed ultrasound in dog's thigh *in vivo* (Hynynen), 85
the effect of pulsed ultrasound on the survival of Drosophila (Pay), 93
the prudent use of diagnostic ultrasound (Wells), 391
the use of ultrasound by physiotherapists in Britain, 1985 (ter Haar), 659
ultrasonically induced gas bubble production in agar based gels: part I, experimental investigation (Daniels), 527
ultrasonically induced gas bubble production in agar based gels: part II, theoretical analysis (Crum), 541

*Internal carotid artery*
failure to demonstrate a vasoconstrictive effect of vasopressin on the internal carotid and middle cerebral arteries: a transcranial ultrasound Doppler study (Krapf), 131
noninvasive assessment of normal carotid bifurcation hemodynamics with color-flow ultrasound imaging (Zierler), 471
the clinical use of objective quantification of flow disturbance in carotid artery disease: correlation between spectral broadening index and arteriography (Sillesen), 519
variability in measurement of specific parameters for carotid duplex examination (Kohler), 637

*Irradiation*
a review of the ultrasonic bioeffects of microsonation, gas-body activation and related cavitation-like phenomena (Miller), 443
acoustic cavitation and the safety of diagnostic ultrasound (Carstensen), 597
acoustic cavitation generated by an extracorporeal shockwave lithotripter (Coleman), 69
altered myocardial contractility with pulsed ultrasound (Mortimer), L567
analytical modelling of ultrasonically induced tissue heating (Lizzi), 607
biological effects of shock waves: lung hemorrhage by shock waves in dogs —pressure dependence (Delius), 61
demonstration of enhanced temperature elevation due to nonlinear propagation of focussed ultrasound in dog's thigh *in vivo* (Hynynen), 85
effect of therapeutic level ultrasound in visual evoked potentials in the hypoxic cat (Forester), 259
effects of MHz ultrasound on electrical pain threshold perception in humans (Williams), 249
the effect of pulsed ultrasound on the survival of Drosophila (Pay), 93
the use of ultrasound by physiotherapists in Britain, 1985 (ter Haar), 659
ultrasonically induced gas bubble production in agar based gels: part I, experimental investigation (Daniels), 527
ultrasonically induced gas bubble production in agar based gels: part II, theoretical analysis (Crum), 541
ultrasonically induced temperature elevation in the mouse ovary (Bailey), L26

In vivo *irradiation*
a review of the ultrasonic bioeffects of microsonation, gas-body activation and related cavitation-like phenomena (Miller), 443
acoustic cavitation and the safety of diagnostic ultrasound (Carstensen), 597
acoustic cavitation generated by an extracorporeal shockwave lithotripter (Coleman), 69

analytical modelling of ultrasonically induced tissue heating (Lizzi), 607
biological effects of shock waves: lung hemorrhage by shock waves in dogs —pressure dependence (Delius), 61
demonstration of enhanced temperature elevation due to nonlinear propagation of focussed ultrasound in dog's thigh *in vivo* (Hynynen), 85
effect of therapeutic level ultrasound in visual evoked potentials in the hypoxic cat (Forester), 259
effects of MHz ultrasound on electrical pain threshold perception in humans (Williams), 249
the effect of pulsed ultrasound on the survival of Drosophila (Pay), 93
the use of ultrasound by physiotherapists in Britain, 1985 (ter Haar), 659
ultrasonically induced temperature elevation in the mouse ovary (Bailey), L26

In vitro *irradiation*
a review of the ultrasonic bioeffects of microsonation, gas-body activation and related cavitation-like phenomena (Miller), 443
acoustic cavitation and the safety of diagnostic ultrasound (Carstensen), 597
acoustic cavitation generated by an extracorporeal shockwave lithotripter (Coleman), 69
altered myocardial contractility with pulsed ultrasound (Mortimer), L567
biological effects of shock waves: lung hemorrhage by shock waves in dogs —pressure dependence (Delius), 61
ultrasonically induced gas bubble production in agar based gels: part I, experimental investigation (Daniels), 527
ultrasonically induced gas bubble production in agar based gels: part II, theoretical analysis (Crum), 541

Law, Y. F., see Morin, J. F.
Lawrence, R., see Kohler, T. R.
Lees, S., Barnard, S. M. and Churchill, D.: the variation of sonic plesio-velocity in dose dependent lathyritic rabbit femurs, 19
Lerner, R. M., see Parker, K. J.
Levin, V. M., see Kolosov, O. V.
Lewin, P. A., Schafer, M. E. and Chivers, R. C.: factors affecting the choice of preamplification for ultrasonic hydrophone probes, 141

*Linear array*
a linear array system for deep vessel explorations (Berson), 267
noninvasive assessment of normal carotid bifurcation hemodynamics with color-flow ultrasound imaging (Zierler), 471
Linder, H. R., see Krapf, R.

*Lithotripsy*
acoustic cavitation and the safety of diagnostic ultrasound (Carstensen), 597
acoustic cavitation generated by an extracorporeal shockwave lithotripter (Coleman), 69
biological effects of shock waves: lung hemorrhage by shock waves in dogs —pressure dependence (Delius), 61
focusing of shock waves in the Dornier lithotripter (Coleman), L25

*Liver*
a particulate contrast agent with potential for ultrasound imaging of liver (Parker), 555
influence of pathological state on the acoustic attenuation coefficient slope of liver (Afschrift), 135
therapeutic ultrasound and the liver *in vivo* (Pearson), L353
Lizzi, F. L. and Ostromogilski, M.: analytical modelling of ultrasonically induced tissue heating, 607
Luckman, N. P., Evans, J. M., Skidmore, R., Baker, J. D. and Wells, P. N. T.: backscattered power in Doppler signals, L669

*Lung*
biological effects of shock waves: lung hemorrhage by shock waves in dogs —pressure dependence (Delius), 61

**M**

Markwalder, T-M., see Krapf, R.
Masotti, L., see Pini, R.

*Maximum velocity analysis*
a vector based approach to age-related changes of Doppler velocity waveforms in the brachial artery (Golczewski), 15
*in vitro* study of continuous wave Doppler spectral changes resulting from stenoses and bulbs (Morin), 5
spectrum analysis in carotid sonography (Zwiebel), 625
Mayev, R. G., see Kolosov, O. V.
McHale, J., see Williams, A. R.

*Mechanical microstructure*
the use of acoustic microscopy for biological tissue characterization (Kolosov), 477

*Menstrual cycle*
ultrasonic Doppler study of the hormone response of blood flow in the normal human breast (Sambrook), 121

*Microsonation*
a review of the ultrasonic bioeffects of microsonation, gas-body activation and related cavitation-like phenomena (Miller), 443

*Microstreaming*
a review of the ultrasonic bioeffects of microsonation, gas-body activation and related cavitation-like phenomena (Miler), 443

*Middle cerebral artery*
failure to demonstrate a vasoconstrictive effect of vasopressin on the internal carotid and middle cerebral arteries: a transcranial ultrasound Doppler study (Krapf), 131
Miller, D. L.: a review of the ultrasonic bioeffects of microsonation, gas-body activation and related cavitation-like phenomena, 443
Miller, D. L., see Williams, A. R.
Minasian, H., see Sambrook, M.

*Models*
analytical modelling of ultrasonically induced tissue heating (Lizzi), 607
Doppler assessment of aortic stenosis: Bernoulli revisited (Rijsterborgh), 241
Doppler ultrasound in aortic stenosis: *in vitro* studies of pressure gradient determination (Holen), 321
*in vitro* study of continuous wave Doppler spectral changes resulting from stenoses and bulbs (Morin), 5
ultrasonically induced gas bubble production in agar based gels: part II, theoretical analysis (Crum), 541
ultrasound-induced light transmission change within platelet suspensions as an indirect measure of platelet morphology: preliminary correlation with stirring-induced light transmission change (Trenchard), 197

ultrasound-induced orientation of discoid platelets and simultaneous changes in light transmission: preliminary characterisation of the phenomenon (Trenchard), 183
Morin, J. F., Johnston, K. W. and Law, Y. F.: *in vitro* study of continuous wave Doppler spectral changes resulting from stenoses and bulbs, 5
Mortimer, A. J. and Trollope, B. J.: altered myocardial contractility with pulsed ultrasound, L567

*MRI imaging*
the value of ultrasound in the initial assessment of gynecological patients (Kurjak), 401

*Myocardial infarction*
two-dimensional and Doppler echocardiography in acute myocardial infarction and its complications (Assman), 507

**N**

*Neonatology*
exploration of the fetal cerebral blood flow by duplex Doppler-linear array system in normal and pathological pregnancies (Arbeille), 329
Nicholls, S. C., see Kohler, T. R.

*Non-thermal effects*
a review of the ultrasonic bioeffects of microsonation, gas-body activation and related cavitation-like phenomena (Miller), 443
acoustic cavitation and the safety of diagnostic ultrasound (Carstensen), 597
acoustic cavitation generated by an extracorporeal shockwave lithotripter (Coleman), 69
effect of therapeutic level ultrasound in visual evoked potentials in the hypoxic cat (Forester), 259

**O**

O'Brien, W. D., Jr., see Bailey, K. I.

*Obstetric ultrasound*
the prudent use of diagnostic ultrasound (Wells), 391
the value of ultrasound in the initial assessment of gynecological patients (Kurjak), 401
Oakley, E. M., see ter Haar, G.

*Orientation dependence*
orientation and frequency dependence of backscatter coefficient in normal and pathological breast tissues (Landini), 77

*Osteolathyrism*
the variation of sonic plesio-velocity in dose dependent lathyritic rabbit femurs (Lees), 19
Ostromogilski, M., see Lizzi, F. L.

*Ovarian imaging*
the value of ultrasound in the initial assessment of gynecological patients (Kurjak), 401

*Ovary*
ultrasonically induced temperature elevation in the mouse ovary (Bailey), L26

P

*Pain perception*
effects of MHz ultrasound on electrical pain threshold perception in humans (Williams), 249

*Pain threshold*
effects of MHz ultrasound on electrical pain threshold perception in humans (Williams), 249
Parker, K. J., Tuthill, T. A., Lerner, R. M. and Violante, M. R.: a particulate contrast agent with potential for ultrasound imaging of liver, 555
Patat, F., see Arbeille, Ph.
Patat, F., see Berson, M.

*Pathology*
variability in measurement of specific parameters for carotid duplex examination (Kohler), 637
Pay, T. L. and Barrick, M. K.: the effect of pulsed ultrasound on the survival of Drosophila, 93
Pearson, D.: therapeutic ultrasound and the liver *in vivo*, L353

*Pelvis*
the value of ultrasound in the initial assessment of gynecological patients (Kurjak), 401

*Periorbital arteries*
Doppler examination of the periorbital arteries adds valuable hemodynamic information in carotid artery disease (Sillesen), 177
Peterson, E. A., see Forester, G. V.

*Phased array*
a linear array system for deep vessel explorations (Berson), 267

*Phantoms*
*in vitro* study of continuous wave Doppler spectral changes resulting from stenoses and bulbs (Morin), 5
Phillips, D. J., see Kohler, T. R.
Phillips, D. J., see Zierler, R. E.

*Physiopathology*
variability in measurement of specific parameters for carotid duplex examination (Kohler), 637

*Physiotherapy*
the use of ultrasound by physiotherapists in Britain, 1985 (ter Haar), 659
Pijpers, L., see Reuss, A.
Pini, R., Ferrucci, L., di Bari, M., Greppi, B., Cerofolini, M., Masotti, L. and Devereux, R. B.: two-dimensional echocardiographic imaging: *in vitro* comparison of conventional and dynamically focused annular array transducers, 643

*Placental index*
exploration of the fetal cerebral blood flow by duplex Doppler-linear array system in normal and pathological pregnancies (Arbeille), 329

*Platelet morphology*
ultrasound-induced light transmission change within platelet suspensions as an indirect measure of platelet morphology: preliminary correlation with stirring-induced light transmission change (Trenchard), 197
ultrasound-induced orientation of discoid platelets and simultaneous changes in light transmissions: preliminary characterisation of the phenomenon (Trenchard), 183

*Platelet orientation*
ultrasound-induced light transmission change within platelet suspensions as an indirect measure of platelet morphology: preliminary correlation with stirring-induced light transmission change (Trenchard), 197
ultrasound-induced orientation of discoid platelets and simultaneous changes in light transmission: preliminary characterisation of the phenomenon (Trenchard), 183

*Platelet viability*
ultrasound-induced light transmission change within platelet suspensions as an indirect measure of platelet morphology: preliminary correlation with stirring-induced light transmission change (Trenchard), 197

*Plesio-velocity*
the variation of sonic plesio-velocity in dose dependent lathyritic rabbit femurs (Lees), 19
Pourcelot, L., see Arbeille, Ph.
Pourcelot, L., see Berson, M.

*Preamplifiers*
factors affecting the choice of preamplification for ultrasonic hydrophone probes (Lewin), 141

*President's message*
president's message 1986–1987 (Thompson), 319

*Pressure gradient*
Doppler assessment of aortic stenosis: Bernoulli revisited (Rijsterborgh), 241
Doppler examination of the periorbital arteries adds valuable hemodynamic information in carotid artery disease (Sillesen), 177
Doppler ultrasound in aortic stenosis: in vitro studies of pressure gradient determination (Holen), 321
Preston, R. C., see Coleman, A. J.
Primozich, J. F., see Kohler, T. R.
Primozich, J. F., see Zierler, R. E.

*Prudence*
the prudence use of diagnostic ultrasound (Wells), 391

*Pulsatility index*
spectrum analysis in carotid sonography (Zwiebel), 625

*Pulsed Doppler*
a linear array system for deep vessel explorations (Berson), 267
failure to demonstrate a vasoconstrictive effect of vasopressin on the internal carotid and middle cerebral arteries: a transcranial ultrasound Doppler study (Krapf), 131
two-dimensional and Doppler echocardiography in acute myocardial infarction and its complications (Assman), 507

**Q**

*Quality control*
ultrasound-induced light transmission change within platelet suspensions as an indirect measure of platelet morphology: preliminary correlation with stirring-induced light transmission change (Trenchard), 197
ultrasound-induced orientation of discoid platelets and simultaneous changes in light transmission: preliminary characterisation of the phenomenon (Trenchard), 183

*Quantitative sonography*
an approach to digital signal processing for ultrasonics research (Knight), 345
influence of pathological state on the acoustic attenuation coefficient slope of liver (Afschrift), 135
the use of acoustic microscopy for biological tissue characterization (Kolosov), 477
spectrum analysis in carotid sonography (Zwiebel), 625

**R**

*Rabbit*
the variation of sonic plesio-velocity in dose dependent lathyritic rabbit femurs (Lees), 19

*Radical formation*
acoustic cavitation generated by an extracorporeal shockwave lithotripter (Coleman), 69

*Real-time scanning*
a linear array system for deep vessel explorations (Berson), 267
a particulate contrast agent with potential for ultrasound imaging of liver (Parker), 555
noninvasive assessment of normal carotid bifurcation hemodynamics with color-flow ultrasound imaging (Zierler), 471
the prudent use of diagnostic ultrasound (Wells), 391
the value of ultrasound in the initial assessment of gynecological patients (Kurjak), 401
two-dimensional and Doppler echocardiography in acute myocardial infarction and its complications (Assman), 507
two-dimensional echocardiographic imaging: *in vitro* comparison of conventional and dynamically focused annular array transducers (Pini), 643
Reantragoon, S. and Chivers, R. C.: a procedure for cutting soft tissue specimens of regular shape, L364
Reed, B., see Williams, A. R.
Remberger, K., see Delius, M.

*Reports*
acoustical society of America 113th meeting, Indianapolis, Indiana, May 11–15, 1987 (Kremkau), 588

allerton conference for ultrasonics in biophysics and bioengineering: cavitation. University of Illinois, May 26–29 1987 (Carstensen), 687
American institute of ultrasound in medicine, annual convention, Las Vegas, September 16–19, 1986 (Kremkau), 169
British bioacoustic discussion group meeting, University of Warwick, Coventry, England. 15 December, 1986 (Williams), 313
eighth annual conference of the IEEE/engineering in medicine and biology society, Forth Worth, Texas, November 7–10, 1986 (Pederson), 227
eleventh international symposium on ultrasonic imaging and tissue characterization, Washington, D.C. 2–4 June 1986 (Reid), 54
international symposium on pattern recognition and acoustical imaging, Newport Beach, California. (Trahey), 385
1986 ultrasonics, ferroelectrics and frequency control symposium, Williamsburg, VA November 17–19, 1986 (Szabo), 231
9th meeting of the European committee for ultrasound radiation safety—the watchdog committee, Helsinki, June, 1987 (ter Haar), 688
physical mechanisms for biological effects of sound and vibration. 112th meeting of the acoustical society of America, Anaheim, California. 9 December 1986 (Nyborg), 307
the 4th international congress on interventional ultrasound, Herlev Hospital, Copenhagen, Denmark, August 15–22, 1986 (Torp-Pedersen), 299
the 4th New England Doppler conference, Durham, New Hampshire, May 27–30, 1987 (Wells), 587
the 39th annual conference on engineering in medicine and biology, Baltimore, Maryland, September 14–16, 1986 (Walter), 53
3rd fetal blood velocity meeting, Paris, March 21, 1987 (Uzan), 590
ultrasound in developing countries, Dubrovnik, October 3 1986 (Palmer), 169
ultrasound in developing countries 2–4 October 1986 Cavtat/Dubrovnik, Yugoslavia (Breyer), 307
Reuss, A., Wladimiroff, J. W., v.d.Wijngaard, J. A. G. W., Pijpers, L. and Stewart, P. A.: fetal renal anomalies, a diagnostic dilemma in the presence of intrauterine growth retardation and oligohydramnios, 619

Sarnelli, R., see Landini, L.
Saunders, J. E., see Coleman, A. J.

*Scattering*
a particulate contrast agent with potential for ultrasound imaging of liver (Parker), 555
orientation and frequency dependence of backscatter coefficient in normal and pathological breast tissues (Landini), 77
Schafer, M. E., see Lewin, P. A.
Schroeder, T., see Sillesen, H.
Schulte, B., see Colon, E.
Senjushkina, T. A., see Kolosov, O. V.

*Shear waves*
a review of the ultrasonic bioeffects of microsonation, gas-body activation and related cavitation-like phenomena (Miller), 443
acoustic cavitation and the safety of diagnostic ultrasound (Carstensen), 597

*Shock formation*
acoustic cavitation and the safety of diagnostic ultrasound (Carstensen), 597
acoustic cavitation generated by an extracorporeal shockwave lithotripter (Coleman), 69
biological effects of shock waves: lung hemorrhage by shock waves in dogs —pressure dependence (Delius), 61

*Shock waves*
biological effects of shock waves: lung hemorrhage by shock waves in dogs —pressure dependence (Delius), 61
focusing of shock waves in the Dornier lithotripter (Coleman), L25
pressure waveforms generated by a Dornier extracorporeal shock-wave lithotripter (Coleman), 651

*Signal processing*
an approach to digital signal processing for ultrasonics research (Knight), 345
orientation and frequency dependence of backscatter coefficient in normal and pathological breast tissues (Landini), 77
the use of acoustic microscopy for biological tissue characterization (Kolosov), 477
spectrum analysis in carotid sonography (Zwiebel), 625
Sillesen, H., Bitsch, K., Steenberg, H. J., Schroeder, T., Hansen, L. and Hansen, H. J. B.: the clinical use of objective quantification of flow disturbance in carotid artery disease: correlation between spectral broadening index and arteriography, 519
Sillesen, H., Schroeder, T., Steenberg, H. J. and Hansen, H. J. B.: Doppler examination of the periorbital arteries adds valuable hemodynamic information in carotid artery disease, 177
Skidmore, R., see Luckman, N. P.

*Sonographers*
ultrasound in developing countries (Kurjak), L277
variability in measurement of specific parameters for carotid duplex examination (Kohler), 637

*Speed of sound*
the variation of sonic plesio-velocity in dose dependent lathyritic rabbit femurs (Lees), 19

*Spectral analysis*
a linear array system for deep vessel explorations (Berson), 267
a vector based approach to age-related changes of Doppler velocity waveforms in the brachial artery (Golczewski), 15
*in vitro* study of continuous wave Doppler spectral changes resulting from stenoses and bulbs (Morin), 5
influence of pathological state on the acoustic attenuation coefficient slope of liver (Afschrift), 135
noninvasive assessment of normal carotid bifurcation hemodynamics with color-flow ultrasound imaging (Zierler), 471
spectrum analysis in carotid sonography (Zwiebel), 625
the clinical use of objective quantification of flow disturbance in carotid artery disease: correlation between spectral broadening index and arteriography (Sillesen), 519

*Spectral broadening*
*in vitro* study of continuous wave Doppler spectral changes resulting from stenoses and bulbs (Morin), 5
the clinical use of objective quantification of flow disturbance in carotid artery disease: correlatoin between spectral broadening index and arteriography (Sillesen), 519
Squartini, F., see Landini, L.

*Standardization*
factors affecting the choice of preamplification for ultrasonic hydrophone probes (Lewin), 141
labelling of ultrasono-tomograms of the heart (Ide), L354
standards for reporting ultrasonic exposures (ter Haar), L668

*Standing waves*
a review of the ultrasonic bioeffects of microsonation, gas-body activation and related cavitation-like phenomena (Miller), 443
Stark, J., see Delius, M.
Steenberg, H. J., see Sillesen, H.

*Stenosis*
*in vitro* study of continuous wave Doppler spectral changes resulting from stenoses and bulbs (Morin), 5
insufficiency of carotid and vertebral flow velocity in cerebrovascular disease: a continuous wave Doppler study (Colon), 339
the clinical use of objective quantification of flow disturbance in carotid artery disease: correlation between spectral broadening index and arteriography (Sillesen), 519
Stewart, P. A., see Reuss, A.
Strandness, D. E., Jr., see Kohler, T. R.
Strandness, D. E., Jr., see Zierler, R. E.

*Streaming*
ultrasound-induced light transmission change within platelet suspensions as

an indirect measure of platelet morphology: preliminary correlation with stirring-induced light transmission change (Trenchard), 197
ultrasound-induced orientation of discoid platelets and simultaneous changes in light transmission: preliminary characterisation of the phenomenon (Trenchard), 183

*Supraorbital artery*
Doppler examination of the periorbital arteries adds valuable hemodynamic information in carotid artery disease (Sillesen), 177

*Supratrochlear artery*
Doppler examination of the periorbital arteries adds valuable hemodynamic information in carotid artery disease (Sillesen), 177

*Surgery*
analytical modelling of ultrasonically induced tissue heating (Lizzi), 607
biological effects of shock waves: lung hemorrhage by shock waves in dogs— pressure dependence (Delius), 61

T

Takeuchi, Y.: color coded Doppler scans, L151
Takeuchi, Y.: color coded Doppler systems, L210

*Temperature*
acoustic cavitation generated by an extracorporeal shockwave lithotripter (Coleman), 69
analytical modelling of ultrasonically induced tissue heating (Lizzi), 607
demonstration of enhanced temperature elevation due to nonlinear propagation of focussed ultrasound in dog's thigh *in vivo* (Hynynen), 85
effects of MHz ultrasound on electrical pain threshold perception in humans (Williams), 249
ultrasonically induced temperature elevation in the mouse ovary (Bailey), L26

*Thermal effects*
analytical modelling of ultrasonically induced tissue heating (Lizzi), 607
effect of therapeutic level ultrasound in visual evoked potentials in the hypoxic cat (Forester), 259
effects of MHz ultrasound on electrical pain threshold perception in humans (Williams), 249
ultrasonically induced temperature elevation in the mouse ovary (Bailey), L26

*Thermocouple array*
demonstration of enhanced temperature elevation due to nonlinear propagation of focussed ultrasound in dog's thigh *in vivo* (Hynynen), 85

*Therapy*
analytical modelling of ultrasonically induced tissue heating (Lizzi), 607
biological effects of shock waves: lung hemorrhage by shock waves in dogs —pressure dependence (Delius), 61
effect of therapeutic level ultrasound in visual evoked potentials in the hypoxic cat (Forester), 259
effects of MHz ultrasound on electrical pain threshold perception in humans (Williams), 249
focusing of shock waves in the Dornier lithotripter (Coleman), L25

the use of ultrasound by physiotherapists in Britain, 1985 (ter Haar), 659
therapeutic ultrasound and the liver *in vivo* (Pearson), L353
Thompson, H.: president's message 1986–1987, 319

*Tissue characterization*
influence of pathological state on the acoustic attenuation coefficient slope of liver (Afschrift), 135
orientation and frequency dependence of backscatter coefficient in normal and pathological breast tissues (Landini), 77
the use of acoustic microscopy for biological tissue characterization (Kolosov), 477

*Torricelli equation*
Doppler ultrasound in aortic stenosis: *in vitro* studies of pressure gradient determination (Holen), 321

*Toxicity*
a review of the ultrasonic bioeffects of microsonation, gas-body activation and related cavitation-like phenomena (Miller), 443
the effect of pulsed ultrasound on the survival of Drosophila (Pay), 93
the prudent use of diagnostic ultrasound (Wells), 391

*Transcranial Doppler ultrasound*
failure to demonstrate a vasoconstrictive effect of vasopressin on the internal carotid and middle cerebral arteries: a transcranial ultrasound Doppler study (Krapf), 1131

*Transducers*
a linear array system for deep vessel explorations (Berson), 267
biological effects of shock waves: lung hemorrhage by shock waves in dogs —pressure dependence (Delius), 61
factors affecting the choice of preamplification for ultrasonic hydrophone probes (Lewin), 141
two-dimensional echocardiographic imaging: *in vitro* comparison of conventional and dynamically focused annular array transducers (Pini), 643

*Transient cavitation*
acoustic cavitation and the safety of diagnostic ultrasound (Carstensen), 597
acoustic cavitation generated by an extracorporeal shockwave lithotripter (Coleman), 69

*Transmission coefficient*
the use of acoustic microscopy for biological tissue characterization (Kolosov), 477
Trenchard, P. M.: ultrasound-induced light transmission change within platelet suspensions as an indirect measure of platelet morphology: preliminary correlation with stirring-induced light transmission change, 197
Trenchard, P. M.: ultrasound-induced orientation of discoid platelets and simultaneous changes in light transmission: preliminary characterisation of the phenomenon, 183
Trollope, B. J., see Mortimer, A. J.

*Turbulence*
Doppler assessment of aortic stenosis: Bernoulli revisited (Rijsterborgh), 241

*in vitro* study of continuous wave Doppler spectral changes resulting from stenoses and bulbs (Morin), 5
spectrum analysis in carotid sonography (Zwiebel), 625
the clinical use of objective quantification of flow disturbance in carotid artery disease: correrlation between spectral broadening index and arteriography (Sillesen), 519
Tuthill, T. A., see Parker, K. J.

U

*Ultrasonic probes*
factors affecting the choice of preamplification for ultrasonic hydrophone probes (Lewin), 141

*Ultrasound measurements*
factors affecting the choice of preamplification for ultrasonic hydrophone probes (Lewin), 141
focusing of shock waves in the Dornier lithotripter (Coleman), L25
the use of acoustic microscopy for biological tissue characterization (Kolosov), 477

*Ultrasound propagation*
demonstration of enhanced temperature elevation due to nonlinear propagation of focussed ultrasound in dog's thigh *in vivo* (Hynynen), 85

*Umbilical artery*
exploration of the fetal cerebral blood flow by duplex Doppler-linear array system in normal and pathological pregnancies (Arbeille), 329

*Umbilical flow*
exploration of the fetal cerebral blood flow by duplex Doppler-linear array system in normal and pathological pregnancies (Arbheille), 329

*Uterus*
the value of ultrasound in the initial assessment of gynecological patients (Kurjak), 401

V

*Valvular disease*
Doppler assessment of aortic stenosis: Bernoulli revisited (Rijsterborgh), 241
Doppler ultrasound in aortic stenosis: *in vitro* studies of pressure gradient determination (Holen), 321

*Variability*
variability in measurement of specific parameters for carotid duplex examination (Kohler), 637

*Vasopressin*
failure to demonstrate a vasoconstrictive effect of vasopressin on the internal carotid and middle cerebral arteries: a transcranial ultrasound Doppler study (Krapf), 131

*Vector based analysis*
a vector based approach to age-related changes of Doppler velocity waveforms in the brachial artery (Golczewski), 15

*Velocity profile*
a linear array system for deep vessel explorations (Berson), 267
a vector based approach to age-related changes of Doppler velocity waveforms in the brachial artery (Golczewski), 15
Doppler assessment of aortic stenosis: Bernoulli revisited (Rijsterborgh), 241

*Ventricular function*
two-dimensional and Doppler echocardiography in acute myocardial infarction and its complications (Assman), 507
Violante, M. R., see Parker, K. J.

*Visual evoked potential*
effect of therapeutic level ultrasound in visual evoked potentials in the hypoxic cat (Forester), 259

*Vertebral arteries*
insufficiency of carotid and vertebral flow velocity in cerebrovascular disease: a continuous wave Doppler study (Colon), 339

*Volume flow*
a linear array system for deep vessel explorations (Berson), 267
